1415 ECHO PARK AVE. LOS ANGELES (26)

THRILLING ADVENTURES WITH BULBS

FALL, WINTER, SPRING, 1946-47

This list contains the Cream of the Crop of the World's Finest Bulb Growers. Thousands of repeat orders sustain our judgment of quality bulbs.

Herewith a couple of sample letters:

LAREDO, TEX., Sept. 1, '45

Dear Mr. Anderson:

I am enclosing an order for some more bulbs. Those I received from you last year were all you described in your catalog—**PERFECT**.

The King Alfred daffodils were the first I believe grown in Laredo and all who saw them would not believe they were real. . . .

I thank you for so promptly filling orders and for the excellent quality of your bulbs.

MRS. W. E.

MILL VALLEY, CALIF., Apr. 2, '46

Dear Bob Anderson:

I couldn't help sitting down and writing you to tell you how beautiful my Ranunculus are this year. I have never seen any to equal them. I have one plant on which I counted 41 buds.

My Hyacinths also were very lovely.

Thank you so much.

MRS. H. C. L.

Please note that this catalog lists bulbs for the four seasons and I suggest that you make up your order with complete season's needs. They will be shipped as they arrive in plenty of time for proper planting. Early orders will be given priority on short items.

Please do not ask us to ship C.O.D. It requires too much time at the post office, and is an additional expense to you. Money will be refunded if we cannot fill your order.

Do not fail to give your zone number if your city is so divided.

The wise gardener will **ORDER NOW** and probably save disappointment later on.

FANCY LEAVED CALADIUM

Delivery January to May

WHY should we be prejudiced in favor of flowers when foliage plants deserve their share of the spotlight, too? There is no grander plant either for variety of color, ease of growing and many uses than the Fancy-leaved Caladium. For specimen plants or for garden culture it is "tops" in color. I have grown it in sand only with chemical nutrients for food. I have grown it from small pips in the garden as a "background" for my Tuberous Begonias. I have failed to find an equal for its value when it comes to the need of a high-class foliage plant, and I herewith offer what I consider ten of the finest varieties. Full cultural directions included with each order.

CANDIDUM—Snow-white with green veins and network. Narrow green border. Fine Easter variety.

HORTILANIA—Center of leaf shining crimson with slight bluish tint. Narrow border. Strong grower.

ITACAPUS—Entire leaf dark red of a rust shade; narrow border with red dottings. One of the most beautiful Caladiums.

JOHN PEED—Bold plant with many leaves. Center transparent cherry-red, light green margin.

LORD DERBY—Delicate transparent rose with dark green ribs and narrow green edge. Abundant foliage. Very similar to "Our Red."

MACAHYBA—Dark moss green profusely spotted and mottled with transparent lilac blotches. Heavy scarlet ribs.

MRS. EDITH E. MEAD—Leaf snow-white (not transparent), with red ribs (no veins), and narrow green edge. Very showy.

MRS. H. B. HALDEMAN—Glowing-bright pink with narrow green edge. Varies to a deep pink according to soil used.

POECILE ANGLAIS—Dwarf, many-leaved type with waxy leaves of deep crimson having a bluish overcast and bordered metallic green. One of the best.

MRS. SANDER—Roundish, dark green leaf, heavily blotched. Transparent deep rose.

Your choice of any of the above, 35c each; \$3.50 per dozen. Postage, 10c each or 25c per dozen.

Grown in pots or glasses, be sure and leave in deep shade until flower spike shows, then gradually bring to light.

BOTTOM HEAT ESSENTIAL

**GREENHOUSE CONDITIONS
DUPLICATED**

NOW you too can start early cuttings, grow tropical bulbs and plants with the skill of the professional.

I am offering for the first time an inexpensive electric heating cable to be laid in the soil that will thermostatically control whatever heat you need to start and maintain in the winter time such exotic bulbs as the Fancy Leaf Caladium, Gloxinia, Orchids—not to mention the early starting of seeds, cuttings, etc.

To show you what difference a little bottom heat means, I planted three flats of dormant baby Callas and left them for two weeks without heat—at the end of this period not a root or bit of growth was indicated. In 48 hours with bottom heat of 70° every bulb had set roots and top growth started.

All one needs is a small glassed-in hot bed either in your yard or lath-house and follow directions furnished for the setting of the apparatus. It comes in two sizes, a 3 ft. x 6 ft. and 6 ft. x 6 ft. size.

TWO SIZES AVAILABLE
